## INSTRUCTIONS

GENERAL: Send an original copy of the application, exhibits and \$250.00 fee to U.S. Dept. of Agriculture, Agricultural Marketing Service, Grain Division, 6525 Belcrest Road, Hyattsville, Maryland 20782. (See Section 180.175 of the regulations and rules of practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

## ITEM

- 5 Insert the date the applicant determined that he had a new variety based on the definition in Section 41 (a) of the Act and decision is made to increase the seed.
- 13a First, give the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. Second, give the details of subsequent stages of selection and multiplication. Third, indicate the type and frequency of variants during reproduction and multiplication and state how these variants may be identified. Fourth, provide evidence on stability.
- 13b First, give any special characteristics of the seed and of the plant as it passes through the seedling stage, flowering stage and the fruiting stage. Second, describe the mature plant and compare it with a similar commercial variety grown under the same conditions, and indicate the differences.
- 13c A supplemental form will be furnished by the PVPO to describe in detail a variety for each kind of seed.
- 13d Provide complete data indicative of novelty. Seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty may be submitted. Seeds submitted may be sterile.
- 13e Indicate whether applicant is the actual breeder, the employer of the breeder, the owner through purchase or inheritance, etc.

## WATERMELON

## SUGAR BUSH

## 13 A. Exhibit A - Origin and Breeding History of the Variety

Result of selection and inbreeding from original cross of short internode Bush Desert King and unknown parentage segregating for bush and vine types received from Dr. M. Fugua at Texas A & M University in 1965.

Selections for short internode red fleshed segregates were inbred for eight generations before a true breeding line was established.

An increase was made in 1974 and no deviates were found in a  $\frac{1}{4}$  acre increase block. This seed was again planted in a 2 acre increase in 1975 and no off types were removed from this population. We therefore consider this to be a stable true breeding line.

WATERMELON

SUGAR BUSH

13 B. Exhibit B - Botanical Description of the Variety

Seed is medium in size, slightly smaller than New Hampshire Midget with a slightly curved tip with shallow cracks in seed coat toward the point of attachment. They are dark brown in color.

Seedlings are thick stemmed and with very short internodes compared to any commercial vining types of watermelons. There are, to our knowledge, presently no short internode types with red flesh commercially in the trade but this is similar in vine type to the Bush Desert King, a yellow fleshed variety described by H. C. Mohr in 1958.

Plants usually show from 2 to 4 branches very close to base of plant that at fruit maturity measure 36 to 42 inches in length.

Fruits are oval in shape measuring from 9-12 inches long and 8-11 inches in equatorial diameter. They are comparable in size to Early Canada. Maturity is in approximately 80 days, 5 days earlier than Charleston Gray.

Rind is medium green in color with darker green veining but not striped. They resemble Early Canada in external color.

Flesh is bright scarlet, firm, sweet and moderately juicy with firm texture.

Watermelon - Citrullus lanatus - Sugarbush

Exhibit D: Data Indicative of Novelty

"Sugarbush" is unique and useful in that the plants spread only about 36"; it is a short internode "bush" type. Fruit exterior medium green with dark veins; thin rind; short oval fruits 10" - 12" long. Medium dark red flesh; matures early, even before most vine types.

Sugarbush qualifies as being novel and distinct as, to our knowledge, there are no short internode types with red flesh available commercially in the trade.

Plant Variety Protection Office

Dear Mr. Fisher:

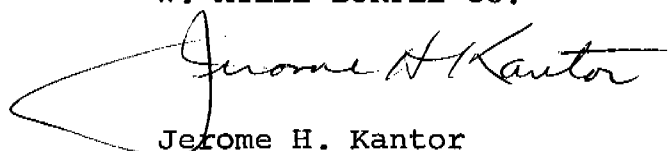

REF: 7600072, WATERMELON, SUGARBUSH

The following is in further support of the above referenced application, to show how Sugarbush differs from Kengarden—

Sugar Bush has lobed leaves while Kengarden is described as having unlobed leaves. The stem internodes of Sugar Bush are approximately 1.5 to 3.0 centimeters longer than Kengarden. The seed weight of Sugar Bush is 76 grams per 1,000 seeds while Kengarden seeds weigh 21 grams per 1,000 seeds. This is by actual count.

See Kengarden description in Vol. 4, No. 2 of Official Journal of the Plant Variety Protection Office.

Sincerely,  
W. ATLEE BURPEE CO.

## WATERMELON APPLICATION NO. 7600072

"SUGAR BUSH"

## REVISED EXHIBIT D

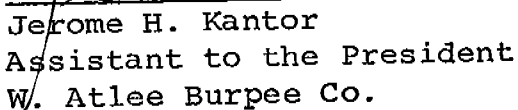

Burpee's Sugar Bush is distinctly different from Kengarden in that it has lobed leaves while Kengarden is described as having unlobed leaves. The stem internodes of Sugar Bush are 1.5 to 3.0 centimeters longer than Kengarden thus making an overall larger plant than Kengarden. The flesh of Kengarden is described as being dark pink while Sugar Bush has bright scarlet flesh. The seed of Sugar Bush are larger than Kengarden and the weight of 1,000 seeds is 76 grams while 1,000 seeds of Kengarden weigh 21 grams.

STATEMENT OF APPLICANT

Exhibit E:

The W. Atlee Burpee Co. believes that it is the original and first breeder of the attached described variety, Watermelon-Citrullus lanatus-"Sugarbush" for which it solicits a certificate; that it has sexually reproduced the variety; that it does not know and does not believe that the same was ever a public variety before the W. Atlee Burpee Co.'s development thereof; the W. Atlee Burpee Co. is the sole breeder of this novel variety; this variety has not been in public use or on sale in the United States more than one year prior to the filing date of this application, or described in any printed publication in any country before W. Atlee Burpee Co.'s development for more than one year prior to this application; and the variety has not been granted rights in any foreign country prior to the date of this application, or an application filed by W. Atlee Burpee Co., or its legal representatives, or assigns, more than twelve months prior to W. Atlee Burpee Co.'s application in the United States.

GRANT OF SECURITY INTEREST  
(PLANT VARIETY CERTIFICATES)

WHEREAS, W. ATLEE BURPEE COMPANY, a Pennsylvania corporation (herein referred to as "Grantor"), has been issued the Plant Variety Certificates listed on Schedule 1 annexed hereto;

WHEREAS, Grantor is a wholly owned Subsidiary of CDS Holding Corp.;

WHEREAS, Grantor has agreed to grant a first priority security interest in substantially all the assets of Grantor to secure the payment of all amounts owing under the Revolving Credit Agreement, dated as of December 30, 1986 (as amended, supplemented or modified from time to time, the "Credit Agreement"), among CDS Holding Corp., the O.M. Scott & Sons Company and Manufacturers Hanover Trust Company (the "Bank" and "Grantee"); and

WHEREAS, pursuant to the terms of a Subsidiary Security Agreement dated as of December 30, 1986 (the "Subsidiary Security Agreement") made by Grantor in favor of Grantee, its successors transferees and assigns Grantor has mortgaged, pledged and granted to Grantee a security interest in all right, title and interest of Grantor in, to and under all Certificates of Plant Variety Protection now or hereafter issued to the Grantee by the Plant Variety Protection Office of the United States Department of Agriculture (or any successor agency thereto) (all such Certificates being herein collectively referred to as "Plant Variety Certificates"), together with any reissues, extensions or renewals thereof whether presently existing or hereafter arising or acquired in connection with the tangible and intangible assets of the Grantor's business, including the goodwill of the business symbolized by the Plant Variety Certificates issued to and the applications therefor and the registrations thereof, and all products and proceeds thereof, including, without limitation, any and all causes of action which may exist by reason of infringement or dilution thereof or injury to the associated goodwill, to secure the payment of all amounts owing under the Credit Agreement and any and all other amounts from time to time directly owing by the Grantor to the Bank;

NOW, THEREFORE, for good and valuable consideration, receipt of which is hereby acknowledged, Grantor does hereby mortgage, pledge and grant to Grantee, its successors, indorses, transfees and assigns, a security interest in all of Grantor's right, title and interest in, to and under the following whether presently existing or hereafter arising or acquired:

(i) each Plant Variety Certificate and Plant Variety Certificate application, including, without limitation, each Plant Variety Certificate and Plant Variety Certificate application referred to in Schedule 1 hereto, and all of the goodwill of the business connected with the use of, and symbolized by, each Plant Variety Certificate and Plant Variety Certificate application;

(v) all products and proceeds of the foregoing, including, without limitation, any claim by Grantor against third parties for past, present or future infringement or dilution of any Plant Variety Certificate registration including, without limitation, any registration referred to in Schedule 1, or for injury to the goodwill associated with any Plant Variety Certificate or Plant Variety Certificate application.

This security interest is granted in conjunction with the security interest granted to the Grantee, its successors, indorses, transfees and assigns, in substantially all of the assets of the Grantor, as set forth in the Security Agreement, of which this Agreement is a part.

Grantor does hereby further acknowledge and affirm that the rights and remedies of Grantee with respect to the security interest in the Plant Variety Certificates, Plant Variety Certificates applications, made and granted hereby are more fully set forth in the Security Agreement, the

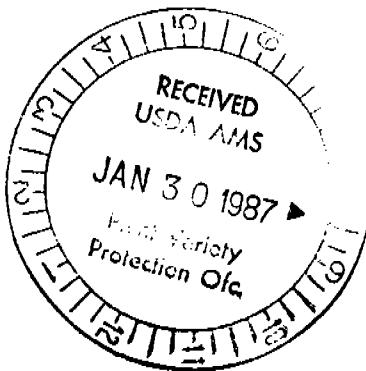

terms and provisions of which are incorporated by reference herein as if fully set forth herein. Terms defined in the Security Agreement shall have their defined meanings when used in this Grant of Security Interest.

IN WITNESS WHEREOF, Grantor has caused this Grant of Security Interest to be duly executed by its officers thereunto duly authorized as of the 30th day of December, 1986.
